Fresh Chemical Engineering graduate from Institut Teknologi Bandung (ITB), specializing in General Chemical Technology, with experience in process evaluation, simulation, and industrial problem solving. Passionate about designing safer, more efficient, and more sustainable chemical processes, with interests spanning process engineering, plant design, and process optimization.

Education

Institut Teknologi Bandung

Bachelor of Chemical Engineering

Jul 2022 – Aug 2026

- Cumulative GPA: 3.65 / 4.00 (Cumlaude)
- Specialization in General Chemical Technology
- Final Year Research Project: Magnesium Carbonate from Direct Air Capture as a Sustainable Flame-Retardant Additive in Polymers
- Final Year Plant Design Project: Thorium-Based Nuclear Power Plant with a Binary Cycle Capacity of 250 MW
- Practicum Assistant for Computational Introduction (Computational Thinking) and Technical Drawing courses
- Teaching Assistant for Computational Thinking, Chemical Engineering Economics, and Mathematics & Process Computing courses

Working Experience

PT Pupuk Kujang

Process Engineer Intern

Jul 2025 – Sep 2025

- Evaluated refrigeration compressor performance in ammonia production using operating and design data analysis
- Assessed compressor efficiency and energy consumption deviations under actual operating conditions
- Developed an Excel-based calculation template to automate compressor efficiency evaluation and performance assessment

Organizational Experience

Himpunan Mahasiswa Teknik Kimia-ITB (HIMATEK-ITB)

Vice Head at Strategic Study Division

May 2025 – May 2026

- Co-led the division in developing and executing research-based initiatives on social, economic, and industrial issues related to chemical engineering and broader topics

Staff at Strategic Study Division

Sep 2023 – May 2025

- Researched and wrote analyses on issues related to chemical engineering and broader topics
- Coordinated and managed events such as the Book Review Seminar: Myth vs Fact of Palm Oil, aimed at educating participants of the truth about palm oil production and its effects

Badan Pengurus Angkatan Fakultas Teknologi Industri 2022 (BPA FTI 2022)

Staff at Academic

Nov 2022 – Jun 2023

- Conducted surveys on students' GPA, mapping out the academic performance of each student and guiding them toward suitable major selections
- Developed and maintained a website to provide accessible course materials, lecture notes, and academic resources for fellow students, ensuring easy access to essential content

Skills and Language

- **Soft Skills:** Analytical Thinking, Problem Solving, Teamwork and Collaboration, Leadership, Adaptability
- **Hard Skills:** Process Simulation & Modeling (Aspen HYSYS, MATLAB), Programming & Analysis (Python, Excel, VBA), CAD & Design (SolidWorks), Microsoft Office Suite (Word, Excel, PowerPoint, Outlook), Data Analysis (Excel, Minitab)
- **Language:** Bahasa Indonesia (Native), English (Advanced)

Certifications and Training

- SolidWorks Design Associate (CSWA)
